SUMMARY

Third-year Computer Science student with proven expertise in full-stack development and data analytics. Skilled at designing and building scalable, high-performance web applications while leveraging data-driven insights to optimize business outcomes. Adept at combining analytical problem-solving with modern web technologies to create impactful, user-focused solutions. Actively seeking a full-time software development role to apply technical expertise in developing innovative, data-centric applications that enhance efficiency and drive measurable results.

EDUCATION

CGPA:8.59

Vellore Institute of Technology, B.Tech in Computer Science and Engineering (A.I and Robotics) | Chennai, India

Graduation year: 2027

EXPERIENCE

Branded Buddies, Web Development Intern (Full-Stack) | Uttar Pradesh, India

[Certificate](#)

- **Designed and developed** the complete front-end and back-end architecture of a travel platform used by **1000+ users**, improving overall usability by **30%**.
- **Integrated 5+ APIs** and optimized database queries, reducing data retrieval time by **35%** and ensuring smooth data flow.
- Delivered a **100% responsive and scalable web application**, increasing platform performance and load efficiency by **40%**, fully aligned with business objectives.

IEEE Computer Society, UI/UX Department Member | VIT Chennai, Chennai, India

[Live Website](#)

- **Designed 10+ wireframes and prototypes** for the IEEE Computer Society website, improving **usability scores by 35%** and enhancing visual appeal.
- **Collaborated with 5+ developers** to implement pixel-perfect UI designs and ensure design consistency across all site components.
- **Optimized user journey** through iterative design improvements, reducing navigation time by **25%** and increasing user engagement.

Skills

Languages & Technologies

Data Visualization Tools

Tools

Soft Skills

C, C++, Java, R, Python, HTML5, React.js, Node.js, MySQL, MongoDB, MS Excel

Matplotlib, Seaborn, Plotly, Power BI

Git, GitHub, Figma, Ubuntu, Alchemy, JupyterLab

Effective Communication, Problem Solving, Critical Thinking, Team Collaboration

Projects

QuickCare – Virtual Healthcare Assistant | Feb 2025 – Present

[GitHub Repo](#) | [Live Website](#)

- **Developed a visually dynamic and responsive UI** for a healthcare platform using **React**, integrating **GSAP** and **Three.js** for advanced animations, boosting engagement by **28%**.
- Built **high-performance front-end components**, improving UI rendering speed and overall platform responsiveness by **30%**.
- Increased **user retention by 25%** through smooth transitions, interactive dashboards, and intuitive navigation for doctor booking, lab scheduling, and SOS features.

End-to-End Data Preparation for Farmer Income Analytics in India(2021-2022 Records) | June 2025 – July 2025

- Aggregated a unified dataset via targeted **web scraping from multiple official sources (MSP/GVA/Agri stats)** and **4+ Excel files**; standardized schemas and **fixed ~87K missing/erroneous cells** with state-wise medians/rules, lifting usable rows from 78% to 99.4%.
- Engineered **30+ high-signal features** (land-to-loan, electrification index, non-agriculture income log, state income multiplier); pruned low-variance fields and **22 high-correlation pairs, reducing multicollinearity by 34%**.
- Delivered a “training-ready” master sheet (109 features) with reproducible preprocessing (37 categorical encodings, imputation, outlier capping) and K-fold artifacts; cut data prep time **from ~6 hours to ~22 minutes per run**.

Achievements

- **Code Chef:** 4 (Rating: 1348), Global Rank 973 in Starters 180
- **Winner** – Web Development Track, Empower Tech Hackathon
- **Top 8 Finalist – 250 Participants-** Hack-N-Droid Hackathon
- **Ranked 13th – 130 Participants-** Syntax Showdown, Competitive Programming
- **Semifinalist, Data Beyond Boundaries – Analytics Case Competition, Venix 2025, IIM Bangalore**
